A Course in Public Mediumship

Public demonstration of mediumship is often referred to as a totally different animal than private work. It is often intimidating to stand in front of a crowd and try to filter information while listening to spirit energy.

This class proves it can be joyful and fun! Whether you are a first time message giver or a practiced platform medium this course offers the opportunity to grow the skills you already use and expand them. The goal is an easy transition from private mediumship to public while breaking bad habits. We will practice how to: identify a spirit person in a way the audience member will understand, keep the link with a spirit person even when interrupted, present yourself in a polished manner, and push yourself beyond your normal way of working.

Each student will receive an opportunity to demonstrate and we will then discuss techniques and suggestions for improvement.
